

Invitation to attend EVAGUIDE's webinar on evacuation procedures

Although stadiums are currently looking at organising games without spectators, everyone hopes to welcome fans back as soon as possible. When doing so, safety and security measures will be followed-up stricter as ever. Evacuation procedures are of course a vital component in this approach. Although, only a minority of clubs have had a (partial) evacuation at their stadium.

Therefore EVAGUIDE, a European funded project, developed a platform for enhanced situation awareness and real-time adaptive evacuation strategies. To support EVAGUIDE in the development of the platform, and to gain insights in the needs and challenges of European stadiums, an extensive survey was created.

On 9 July, EVAGUIDE is organising its first webinar where different experts will share insights on evacuation procedures and the EVAGUIDE platform. The detailed agenda of the event includes:

- 11:00** **Insights on stadium evacuation procedures – ESSMA Survey**
Feedback and insights from SGSA – Ken Scott
- 11:20** **Introduction to EVAGUIDE Platform**
- 11:30** **Demonstration of the platform**
- 11:50** **Q&A**

Gain insights on available technologies to digitalise evacuation protocols, train staff in effectively managing evacuations and get inspiration from other clubs on 9 July at 11AM CET!

[Subscribe here for the webinar »](#)

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme, under grant agreement no 831154
